Profile

I design and provide education for fire-resistant habitats that:

- recharge groundwater and rehydrate soils
- catch water for potable and non-potable use
- produce a natural abundance of plant-based food and medicine

All my foci are targeted at cost-effective, maintenance-free, climate-resilient, decentralized solutions that will last over a thousand years.

Language Proficiencies: English - French - Spanish(basic)
Certified: Permaculture Design & American Rainwater Catchment Systems
